

# HTML Practice Questions

## Practice Questions on <div> Tag

1. Create a webpage layout using <div> tags to structure a header, navigation bar, main content, and footer. Apply basic CSS to each section for styling.
2. Using <div> tags, create a simple card layout that includes an image, title, description, and a button. Style it using CSS to resemble a basic card.
3. Create a <div> webpage with three child <div> elements representing columns. Use CSS Flexbox or Grid to place these columns side-by-side.
4. Create a responsive layout using <div> elements that adjust from a single column on small screens to multiple columns on larger screens.

## Practice Questions on <iframe> Tag

1. Create a <iframe> that displays a YouTube video. Use the allow Fullscreen attribute to enable fullscreen mode.
2. Using inline CSS, hide the borders of an <iframe> that embeds an external page.
3. Create an HTML page with an <iframe> that displays another local HTML file (for example, about.html). Use relative paths to achieve this.
4. Build a web page with an <iframe> that automatically starts playing a YouTube video (hint: check the src URL for autoplay parameters).
